FOR IMMEDIATE RELEASE
October 19, 2023

POLARIS Laboratories® Announces Fluid Analysis Program Champion Awards

Four companies recognized for the 2023 Fluid Analysis Program Champion Awards

INDIANAPOLIS – Annually, POLARIS Laboratories® recognizes outstanding customers for achieving excellence in their fluid analysis programs. This year's award finalists, split into two tiers based on program size, were selected based on program performance, fluid sampling compliance, team buy-in and continuous program improvement efforts.

Presented during the annual fluid analysis and reliability-focused conference, the 2023 Reliability Summit | INTEGRATE, on October 3, 2023, in Indianapolis – these awards signify program excellence, significant improvement efforts, impactful maintenance actions taken and appreciation of the dedicated work put into the programs.

"A program champion is an integral part of a successful fluid analysis program as the champion serves as the liaison between mechanics, management and the laboratory and voluntarily takes on the adoption and implementation of the program. It's amazing to see the work these champions put into their programs, and I give my congratulations to all of this year's finalists and winners." - Randy Clark, POLARIS Laboratories® Manager of Reliability.

POLARIS Laboratories® awards The Shelly Company, as the Tier II Winner and Logan Aluminum as the Tier I Winner of the 2023 Fluid Analysis Program Champion Award. Hornbeck Offshore® and Nyrstar are named Tier II and Tier I Award finalists, respectively.
